SUMMARY

Full Stack Developer with around 2 years of professional experience building responsive, production-grade web applications using React, Next.js, and TypeScript, combined with self-learned backend development using Node.js, Express.js, MongoDB, and MySQL. Skilled in REST API integration, reusable component architecture, and end-to-end feature development across the stack.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap, HTML5, CSS3, React Router

Backend & APIs: Node.js, Express.js, MongoDB, MySQL, REST APIs, Axios, React Query

Tools & Practices: Git, GitHub, Postman, Responsive Design, Authentication & Authorization, Payment Gateway Integration

PROFESSIONAL EXPERIENCE

Associate Software Engineer — Infynno Solutions

April 2025 – Present

Full-Stack Feature Development | Multi-platform product ecosystem

- Collaborated with a cross-functional team of 25+ members across an interconnected multi-platform ecosystem spanning video calling, messaging, live streaming, and social content, maintaining direct client communication.
- Developed end-to-end booking flows for scheduled video and audio calls, covering creator-side setup and fan-side payment integration.
- Built one-to-one and group chat experiences with subscription-based content locking, pay-to-unlock messaging, and audio/video calling functionality.
- Implemented end-to-end subscription management (upgrades, downgrades, and payment history) alongside user profile, security, and privacy settings.
- Built earning and subscription-tracking dashboards that aggregated financial data across multiple connected platforms.

Associate Trainee — Infynno Solutions

October 2024 – March 2025

- Developed responsive, mobile-first web interfaces for a WebView-integrated mobile application using Next.js, React, and Tailwind CSS.
- Built and enhanced bill payment and trading modules, implementing reusable UI components, form validations, and search/select flows.
- Integrated REST APIs using Axios and React Query, including data fetching, mutations, error handling, API interceptors, and authentication flows.

PERSONAL PROJECTS

FreshMart — Full-Stack Grocery Shopping Platform [GitHub](#)

React.js, Node.js, Express.js, MongoDB, React Router

- Developed a full-stack grocery platform with Admin and Customer workflows covering product discovery, filtering, cart, checkout, and order management.
- Implemented authentication and role-based access control, with REST API integration between React and Node.js/Express.js; integrated payment processing.

Aora — Full-Stack Video Streaming Application [GitHub](#)

React Native, Expo Router, NativeWind, Node.js, Express.js, MongoDB

- Built a full-stack video platform with authentication, video creation, search, bookmarking, streaming, and profile management using RESTful backend services.

KIM-BCA — E-Learning & Resource Platform [GitHub](#)

HTML, CSS, JavaScript, Formspring API, Google Drive

- Built and deployed a centralized learning platform for BCA students with 40+ semester-wise e-books and study resources, reaching 100+ active users and adoption by 70%+ of BCA students at my college.

EDUCATION

Master of Computer Applications (MCA) — Gujarat Technological University | CGPA: 8.5

2024 – 2026

Bachelor's of Computer Applications (BCA) — Gujarat University | CGPA: 8.71

2021 – 2024
